

SPOTLIGHT 186 - *Radio Barones*

I THINK RADIO BARONES needs very little introduction as I'm sure there can't be many 186 metre DXers around who have not heard the strongest pirate from Holland. No wonder his fellow pirates call him the maestro. His other nickname is "the man with the cigar!" A very art name indeed as having had the Baro as a guest in my house for five days, I'm still finding the odd empty cigar box!

It's nearly twenty years since he first took to the air. The fourth of September 1973 to be exact using the name SKYLAB for MW transmissions. He told me that his first international report came from a German DXer and at that time, he was using 150 watts on 1325 kHz.

Besides the SKYLAB, other names used have been ELECTED, DISCO 74, SCHRIK VAN DE BUURT and ATHENA before becoming RADIO BARONES. Occasionally he does programmes using the name SWINGING RADIO JOHNNY.

Playing mostly hits and rock music from the 70's, the Baro does sometimes also play Dutch music. He has also recently introduced the "Country Corner" into his Friday programmes on 1509 kHz.

Mr Baro works as a milk mechanic and his hobbies are football and of course, music. He is also partial to the odd glass of beer as I soon found out from his recent visit to Preston.

Operator, Johan is 36 years old and although his current status is single, he has been married and has a nine year old daughter.

Taking a look at the studio which is quite spacious, we find transmitter, modulator, turntables, mikes etc.

Also, there are two receivers - A Philips bi-ampli and a Racal RA17 L. Surprisingly, the transmitter is quite small with only two small tubes. When you see the modulator though, you realise where the power comes from. It is an amazing thing and with four huge tubes, it is capable of well over 1000 watts. Everything is self built.

Fortunately, Johan lives in a remote area and has plenty of room for the enormous antenna which stands 25 metres high and is around 50 metres in length.

You can hear RADIO BARONES every second Friday of the month on 1509 with an international programme. He also operates on 1615 and 1611 kHz. Look out for him soon on 1607 as well.

His future plans are to make the antenna even higher and also to increase the power to something like 2 KW!

Reports have been received from all countries in Europe, the eastern part of Russia and even Canada.

The address for the station is P.O. BOX 73, 7160 AB Neele, Netherlands. Several new QSL cards are available along with various coloured stickers and promotional items so it certainly is well worth dropping the station a line. Johan promises a quick reply to all reports from now on. ■

PIRATE CONNECTION 3

The Scandinavian Free Radio Magazine

This is **Pirate Connection**, a Free Radio magazine focusing on Scandinavian, European and North American pirate radio. PC is published on a bi-monthly basis and the contents will in many respects be dependent on contributions from our readers. Everyone is therefore invited to send in just anything that may be of interest, news, logs, articles etc.

Subscription rates

Sample copy: 20SEK / 4USD / £2 / 4IRC.
Subscription 1 year (6 issues): Scandinavia 120SEK, Europe 150SEK / 21USD / £14 / 34DM, outside Europe SEK170 / 24USD / £15, Regular editors 120SEK / 17USD / £11 / 27DM. The money can be sent by cash to Stefan or be sent to Stefan's personal postal giro account 690708-2710 (add SEK25 if transferring to our giro account from abroad!!!). Please don't send any checks.

Editorial speaking

Happy New Year everybody and welcome to another crammed edition of the Pirate Connection! Hope you've had a great Christmas & New Year holiday with lots of nice catches of Free Radio stations. I did and also had quite a few nice loggings on both SW & MW. Unfortunately, I have heard nothing from our dear Igor Krilov from Moscow. It seems as if my mail to him hasn't reach him and so I haven't got his fantastic **Eastern Lookout** column. I'm sure I'll get in contact with him in the near future and he'll surely be back in the next edition of PC. On the other hand, I'll introduce three new columns. **The Pirate Log** by Göran Poulsen will give you the past two months' of SW logs. We've decided to separate the SW and MW logs; Göran will take care of SW and Derek handles the MW-logs. But please note that the MW-logs should be sent to Pirate Connection hqs since I edit Derek's pages. The SW-logs can be sent to too, deadline for those will be two days prior to our main deadline as stated above. I've also introduced a 'readers column' in this issue in which I'll quote some of the letters I've received lately. This will also be a forum for any ideas you might have on any topic. Once again, I must thank all of you for your encouraging letters & telephone calls! It's also very nice to know that so many people are willing to work for Pirate Connection, that will make my burden on this mag a little easier. The third new column is written by rather freely-spoken Jolly Jake from Radio Fusion International and it's called **Jolly Jake's Rambling Thoughts**. I guess his rather different thought might get people mad, but apparently that's exactly his intention. He never fears to say what he really thinks and I must say I truly liked his first column! Jake welcomes any comments to his address above. **Euro Pirate Scene** published by myself is now expanded and also have a different format which I think is more enjoyable. Thanks to the both Björns (Fransson & Quaeck) for their comments on this column, highly appreciated!

EURO PIRATE SCENE

Edited by Stefan Printz

Hello & welcome to another edition of EPS. The format of this column has dramatically changed, to the better I hope, and I hope you'll like this twocolumn format with lots of illustrations. Thanks to Björn Fransson & Bjoern Quaeck for their comments about my column! I think this is the kind of column they want. Conditions have been fairly good the recent months, especially end of October/beginning of November provided excellent conditions. November 8th had "not-of-this-earth" conditions on 41 metres with signal rates I hardly could believe. **Radio Piraña International** had S9+30 on my S-meter. Yes, you read correctly, S9+30!!! **Radio Fusion International** on different frequencies on 41 metres almost as good! I noted **Britain Radio International** with Q4+ quality, best signal ever from them received here. **Radio Pacman** was the biggest surprise this day. Pacman is a low-power station using just 5 W and had S9+10 on my receiver on 7358 kHz!!! **Weekend Music Radio** though, "only" gave a signal of S5. I've never experienced anything like this before! A pity not more makes use of 41 metre band, because when conditions are good, it seems as though one can reach just anywhere with hardly no power at all! There was quite a lot of activity during the Christmas holidays and I'll report about some of it below. A new station noted here was **FRS London** on 6288 kHz, a UK based station but no address was announced. Another new appearance was made by **Radio Lion** on 6300 kHz, heard by Göran Poulsen here in Sweden. Göran has been a keen Free Radio DX-er for many years, lives in Malmö and is a member of the Malmö Short Wave Club, which is very well-known in Sweden for their good coverage of the Free Radio stations in their DX-magazine "On Air". And Göran writes a regular column of Free Radio station loggings in it and has been doing so for 10 years! I also had a regular Free Radio info column in the mag 1987-1992, but I have now left On Air in favour of Pirate Connection. Anyway, Göran called me up a while ago, suggesting we should start a log column in Pirate Connection and I thought it was a great idea! So from this issue of PC and onwards, Göran will edit a column of SW logs which will be a good supplement to this column. Contributions can be sent to PC hqs or to Görans private address which you'll find on page 2. Now let's have a look on the past two months' pirate activity...

Radio Action from Wehl in Holland made a come-back after their long absence from the SW scene on Boxing Day 6206 kHz and were noted with Q4 here with pop & modern kind of music. Address is Box 26, 7030 AA Wehl, Holland.
ANP DV SPZ

Radio Aries is a newcomer on SW and has been heard quite a few times in October and November via the facilities of **WNKR**. Their first broadcast resulted in 18 reception reports which is not too bad. Address is Wuppertal maildrop.
FDX FRS

Britain Radio International are back to their normal schedule I believe, with 4 hour programming on 2nd and 4th Sundays of the month on 6235 in parallel with 7360 kHz. Good signals noted here in Sweden on both channels. Heard on Boxing Day and December 27th with nice programs by Roger Davis & Jayne. Roger offered a limited QSL-edition for female listeners and he promised he would sign them personally he told...
SPZ

Radio Caroline can now also be heard on 3925 kHz in addition to their 6295 kHz outlet. A strange choice I think because of the terrible QRM in the 3925 kHz area. Swedish pirate **Radio Fusion International** used 3925 kHz as their main channel in September and October, but moved due to the severe interference caused by those peculiar utility stations or whatever it is that puts out carrier signals with no information! However, Caroline hasn't been heard here on 3925 kHz of late, nor have I seen any logs of them in Free-DX, so maybe they've already

given up the channel?

FDX SPZ

R Cecile Int is supposed to be the name of a new Irish station relayed by the NIRS New Year's Day on 6262 kHz. Was heard at 8.50-9.15 with catchy jingles and Irish folk & pop music. The address announced was the NIRS maildrop. MDG

A former Scandinavian FM-pirate is planning to start a SW-station called **Channel Europe** on 6310 kHz or thereabout. The station is currently looking for a transmitter and as soon they'll find one, they'll start broadcasting programmes in English & German with a pop & rock format. This station can be contacted via Pirate Connection till the station gets an official mailing address. JA SPZ

Radio City is one of those 'mysterious' stations and is believed to be operating from Germany. One of their rare appearances took place on Christmas Day on 6210 kHz with rather good signals noted here. Had slightly low mode with special Christmas programme and as usually they had an oldie programme. City can be contacted through the Wuppertal maildrop. SPZ

Crazy Wave Radio is thought to be the name for a new German station that made its debut on January 10th on 6272 kHz, heard at 8.29-10.25. Programmes were in German mostly, but also had a few address announcements in English. Music featured were disco, German rock and similar. A few Queen tunes were also noted ("We are the champions" and "Radio Gaga"). Address for this one is Box 202, 6440 Bebra in Germany. BL FDX SPZ

Radio Delta - "The Big D" from Elburg offers a station magazine for £5 which should contain lots of information about this rather old Dutch pirate station. At present, Delta is using 6199-6202 kHz range and last noted January 17th. By the way, Delta was noted with a test on 26 metres 11405 kHz with a fairish signal reports FRS Goes DX. FRS PCH SPZ

Dun Laoghaire Local Radio 106 which is active on 6227 kHz at present are thinking of relaying their FM programmes on 9960 kHz. FDX

Norman Nelson's famous **Radio East Coast Commercial** was noted here on Christmas Day

on 6250 kHz which seems to be the new frequency for the station. SPZ

Emerald Radio International are new on SW using 6240 kHz. They are from Ireland and heard for the first time on October 11th. Was on nearly every day late November and heard several times in December. Now the station have disappeared from 6240 and was noted on 6855 kHz on January 10th and that might become their new frequency. The station is operated by John Richmond of former **Capital Radio International**. Address in CPL. FDX PCH SPZ

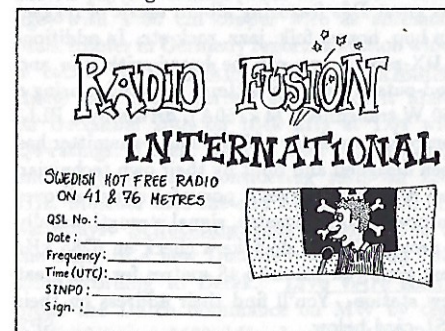

A new (?) Russian station, named **Radio Europe** was heard and reported by Thomas Reintam on Christmas Eve at 23.15 on 3920 kHz. However, Mikael Dahlberg says it was **Romantic Space Radio** via RWBI. Did anyone else hear this? I guess we'll have to ask our Russian readers about this. MDG TRE

Fox AM is a new German pirate that was noted by Maik Köhler in Germany on 6252 kHz December 6th at 9 hours UTC. Signal rate at his location was Q2-3 with music by e.g. Midnight Runners. Address is Venlo maildrop in Holland. MK

Free Radio Service London (FRS London) is new from UK and was noted here with a weak signal on 6288 kHz January 3rd with popmusic format & jingles. Our friends at Free DX say that they still haven't announced no address, but hopefully it will be provided in the next issue of CPL/PC. FDX SPZ

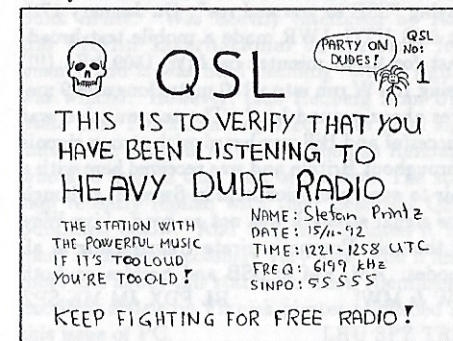

Radio Fusion International is planning to be even more active on 41 metres Sunday mornings starting at 9, 10 or 11 UTC with main frequency being 7415 kHz (on 76 m main fq is 3915, see "76 metres" for further info on RFI's 76 m broadcasts). Jolly Jake says that 41 metres have given a very good response, especially from German listeners who say they like his heavy music format of fusion and rock. Recently RFI tested SSB mode on 76 metres with very good reception noted in the UK, and so Jake tested in USB on 41 metres (7415 kHz) January 17th between 10.45-13.25 UTC featuring "Free Radio Climax" by Jake himself who was giving the latest info on the Free Radio scene and after that a new DJ was heard, Wild Bob presenting a 1 hour show called "The Pilgrim Show" and then Jake was

back again with his "Rambling thoughts" (most of what was said can be read on page 35). Reports tell that reception of this broadcast was rather good over Europe, so he might choose to continue broadcasting in USB. "A signal is much more easily understood in SSB, especially when the op talks. The music is perhaps better in AM, but personally I don't think it's a big difference, so I prefer SSB. Look at the US-pirates, many of them are using SSB and it's stupid not to use SSB if you have the possibility to do so", Jake said when I last spoke with him. Jake is also thinking about starting on FM in his local area under a different name, but these are plans a few months ahead. RFI expects to be active most Saturday nights on 76 metres and most Sunday mornings on 41 metres. Power at present is 30-40 W put into a half-wave dipole 9 metres above ground level. SPZ

Heavy Dude Radio finally came to the airwaves on November 15th at 12.20 with a 1 hour test transmission on 6199 kHz. Tests were also carried out on 6233 kHz. Another test was also made the following week on 6200 kHz November 22nd with S9+15 strength here. HDR intended to start already in spring last year, but for some reasons they didn't come on the airwaves until now. The station, now using 6210 kHz, was very active in December and early January, heard almost every week with "Mr Heavy Dude" and his irresistible heavy rock shows. Programmes on January 10th also featured guest DJ "Mr Hawk" who presented some different type of music, including Nirvana, Roxette and Dire Straits. They also had a quiz where one could win fine CDs as prizes. First prize was Toto's new album. Not bad eh? HDR is using a home-built, very good 70 W transmitter which have given excellent signals in Sweden and Germany. But the operator isn't quite satisfied with the frequency, since Jolly Roger Radio and other stations

also use 6210 kHz, so he'll get new crystals and might move to some other 48 m frequency in the near future. HDR has no connection to the other new Swedish SW-pirates, but there might be some joint transmissions together with **Radio Fusion International** I've been told. At present, HDR is one of the most active pirates on the SW scene, even more active than Fusion, and is usually on for 3 or 4 hours! So have a "tune-in" to the heaviest sound on short wave, Heavy Dude Radio on 6210 kHz... MK SPZ

Radio Ireland International made a comeback to the airwaves on Christmas Day via Jolly Roger Radio on 6209 kHz. Were also reported on 6625 kHz with their own 12 W transmitter (recently purchased from JRR) over Christmas. Address unknown, but maybe JRR address will work. SPZ

Radio Italia Internazionale, the Italian SW station on 7140 kHz, offers a QSL card at the address of Vicolo Volusio, 06049 Spoleto, Italy. Their telephone number is +39-743-223148 and their fax number is +39-743-223310. All this informed by... BP

Radio Lightning Int are rather new on SW, noticed first time December 13th on 6209 kHz. Heard again on January 10th with a short broadcast and is expected to get a new transmitter soon. Probable address is Box 10, Stuart House, Kings Street, Droylsden, Manchester, England. FDX

Radio Lion is another new UK-based station that was noted by Göran on January 3rd with DJ Tony Stuart. Also noted in England on December 27th. No address known. GÖP

Live Wire Radio carried out a very successful broadcast on 11410 kHz in FM mode (!) Decem-

ber 6th at 12 UTC reported Johan Munstra from Groningen in Holland on my answering machine and also Maik Köhler in Germany. Very good signals & reception quality were noted by Johan which should be good news to Bill. Maik had a reception of 44333 which is also rather good. Bill says he was using 80 W into a dipole and so far he's got 14 reports for this transmission which is a rather good response I think. On Christmas Day, Bill had an experimental transmission on 6290 kHz in USB. Played a jingle saying "SSB to you and me". On January 17th at 0.08 UTC, LWR made a mobile test broadcast for 2x45 minutes on MW 1509 kHz (!!!) using 150 W run into a 100 metre longwire 9 metres above ground level. The transmission was successful and Bill was heard with strong signals throughout Britain and was received here with a fair to good reception here in Sweden, although the signal strength was not so good. Live Wire is the only European pirate transmitting in all modes: AM, FM & SSB and besides on both SW & MW!

BL FDX JM MK SPZ

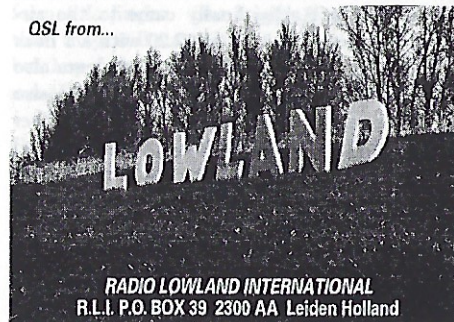

Radio Lowland Int are new from Leiden in Holland and were noted for the first time October 25th on 6285 kHz. Since then they've been active on 6285 kHz appr twice a month with a few hours' programming each time. They have one or two female presenters in their staff who are always nice to listen to as their is a small

amount of women in Free Radio, to say the least. The station was founded in 1977 by then 14-year-old Henk and 12-year-old Paul as an FM "DX-station" using the name **Radio Zanzibar**. In 1980 they were raided by the RCD, but they were back again the same year under a new name. Until now, they have spoken to 500 different FM stations all over Holland. In April 1982, they made their first SW broadcast with a modified army transmitter (GRC9) with 18 W of power. The frequencies used were 6262 & 6285 kHz, but the transmission took an abrupt end, as Paul and Henk started studying and they were not able to continue broadcasting until their comeback on October 25th last year. They are now broadcasting from an area in Holland where the ground is below the sea-level, hence the name "Lowland". They intend to broadcast once a month on an irregular basis with various guest DJs featuring album music of reggae, hip hop, house, folk, jazz, rock etc. In addition, a DX-programme can be heard with info and read-outs of listeners' letters. Lowland is using a 160 W transmitter (4x150A), driven by a PLL-controlled oscillator of 5 W. The transmitter has been designed and built by their own technician and it certainly gives a powerful signal all over Europe. Here in Sweden, signal strength usually is around S9. So do take a check on 6285 kHz next time you listen to 48 metres for this great new station. You'll find their address on their QSL-card below.

SPZ

QSL from...

Radio Marabu recently sent us their current schedule which is as follows:

Every first sunday each month	Every second sunday each month	Every third sunday each month	Every fourth sunday each month
0800-0900 UTC ON 7294KHZ	0800-0900 UTC ON 7294	0800-0900 UTC ON 7294	0800-0900 UTC ON 7294 UTC
1000-1100 UTC ON 6230 KHZ		1000-1100 UTC ON 6230 KHZ	
0900-1300 UTC ON 6262KHZ	0900-1300 UTC ON 7484 KHZ		UTC+1 HOUR EMEZ

WINTER SCHEDULE
(27.10.92 - 27.03.93)

Radio Mayday were noted here both Christmas Day and December 27th on 6270 kHz with Q3 quality. The programmes contained announcements heavily distorted by echo-effects, Finnish rock and various pop music. See Anssi's column for further details.

SPZ

Medium wave. A dramatic change on MW which I'm sure you've noticed is the recent move from 186 to 183 metres (1630-1645 kHz) by several stations, including **Nooitgedacht**, **Barones** (also known as "The Maestro") and **Tydbreker**, which are some of the most well-known and active stations on the 'new' MW band. **Radio Pirana** is still regular on 1509 kHz every Sunday night/Monday morning at 0-2 providing excellent signals throughout Europe. I even managed to pick up their signal on my FM tuner (with MW band coverage) with a 50 cm copper wire as antenna... Maik Köhler in Germany reports a station which is called **Radio Zukunft der Niederlanden** (hope this is the correct spelling of it Maik) on December 20th on 1640 kHz at 1.04 with Q4-ratings. Derek, what is this? **Casablanca** and **Meteoor** are considering tests on 1509 kHz. Meteoor uses the odd frequency 1700 kHz Saturdays. **Schotelamateur** is believed to be the name of a new Dutchie operating on 1570 kHz according to Derek. **Live Wire Radio** broke the Dutch dominance on MW by testing mobile on 1509 kHz January 17th with 150 W (see also under Live Wire Radio)! Derek wonders if anyone can shed any light on these following mystery stations which have been heard recently: 5th & 6th December on 1638.4 kHz **WJIB**, Boston, USA! Listed as FM only on 97 MHz in WRTH. On the same frequency **Highlands Radio**, Letterkenny in Ireland was heard all evening December 21st. **North Atlantic Radio** is an Irish pirate noted by Derek on 1607 & 1621 kHz many times. **Pedro Radio** told me in a recent letter that he's active each Sunday between 9-13 on 1400 kHz. Although daytime, I think there's a chance of hearing his signal during winter time because 1400 kHz is very clear. I tried to tune in to his planned Christmas Day broadcast, but heard **Radio Nova 4** (I think it was) on 1398 kHz instead...

DT SPZ

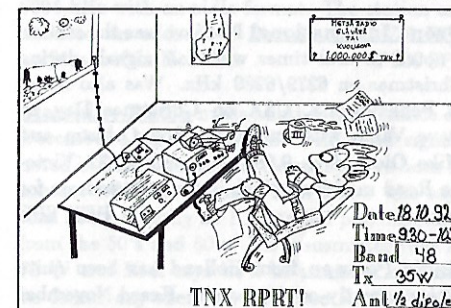

Another Finnish pirate, **Radio Meteoor** was noted plenty of times during Christmas on different frequencies at various times (see the log

column). Meteoor's programmes consisted of pop music and DX-reports in Finnish about what the operator had heard on the SW bands. Signal quality here was about Q3-4.

SPZ

A third Finnish pirate, **Metsäradio** (the Finnish pirates seem to like names beginning with an 'M') was heard with a very weak signal here in Lund in southern Sweden on 6238 October 18th, playing Midnight Oil, "Pale Rider" (classical Clint Eastwood movie) theme and punk music. Was heavily interfered by **Radio Merlin International** on the same frequency and it was hard deciding "which signal was which". However, Lars Hedberg from Uppsala near Stockholm reported quite good signals of the stations as well as Thomas Reintam who also lives in that part of Sweden. The station recently replied with their beautiful QSL published below. And they had painted it by hand in different colours! Very nice. You'll find more info about this station in Anssi Nieminen's excellent article on Finnish pirates published in this issue of PC.

LHU SPZ TRE

Moonlight Radio was noted via NIRS January 17th on 6296 kHz. Had fair reception here and announced the NIRS maildrop. CES SPZ

The 1993 Worldwide Pirate Logbook is a book that Andrew Yoder of US pirate mag **Pirate Pages** has decided to publish and it will contain all of the logs of SW pirates from all around the world, divided into sections on North America, Europe and hopefully also Oceania. The book will start with coverage of the pirate events for 1992 and discuss some of the stations that were on. It will be quite unlike George Zeller's **Pirate Radio Directory** says Andrew, but professionally printed and approximately 160 pages! The price without postage is estimated at \$10. Any contributions to this book (I guess Andrew must have any contribu-

tions pretty soon) can be sent to Andrew at Box 109, Blue Ridge Summit, PA 17214, USA. AY

Radio North International are new and were noted in UK on November 29th with a lengthy programme. Said they had been on before but noone had ever heard them. No address is known. FDX

Radio Northsea International is the new name of a German station using 6252 kHz. Heard by Göran on November 8th and noted by me with fair signal on January 3rd at 9.06 with music by ABBA and Gianna Nannini. Uses Wuppertal maildrop. FDX GÖP SPZ

Not Radio Fax was a spoof station noted on Saturday night October 3rd with an announcement that the station would be back again on 3910, 6205 & 12255 kHz the following week. On October 12th, the station came on all frequencies with a country music programme. Indeed, FRS Goes DX reveals, this station was **not** Radio Fax! FRS PCH

Ozone International I believe was the station I noted several times with fair signals during Christmas on 6279/6280 kHz. Was also noted in Pennsylvania, USA on Christmas Day by Dave Valko with music by Roy Orbison and Mike Oldfield at 9.08. Announced 32 Victoria Road maildrop which is the new address for Ozone. DV PCH SPZ

Radio Pacman from Holland has been quite active recently on 41 metres. Heard November 8th on 7358 with a QSO with **Radio Fusion International** and **Weekend Music Radio** (see the preface). Noted again on 7358 kHz December 27th at 13.30 with 5 W and Q5 quality! Maik also has noted the station on December 20th at 8.50 on 7410 kHz which is a new frequency for the station. MK SPZ

Radio Pamela has been testing on the odd frequencies of 2382 & 4764 kHz (January 8th). Is also believed to test on 3 Megs soon. FDX

Op Jorge R Garcia of **Radio Piraña International** is on a 2 month holiday in South America visiting his families over there. A true pirate as he is, he brought his 12/15 Meg transmitter (in pieces!) and he has now started transmitting on 15013 kHz. As from 22nd of January

and one week onwards, he'll live somewhere in the South American jungles (!!!) and broadcast every day at 10 & 23 UTC. After the week in the jungle, Jorge can be heard each Saturday and Sunday at the same times (10 & 23), so do check out for this very exotic pirate. At the end of February, Jorge should be back with normal programming, from somewhere in Europe...SPZ

RADIO PIRANA INT.
QSL 
To: Stefan Printz We are pleased to confirm your reception report that is in accordance with our programmes details.
Date: 1st March 92 Time: 18.30-19.00 UTC Freq: 5915 kHz
SINPO: 5444 Tx Power: 70 W
Ant.: (compare with a.k.u.) QSL no: 001
THANK YOU! Sincerely:

Pirate Chat has a new address of 12 Dorman Road, Preston, Lancs PR2 6AS, England as from January 1st. This indispensable magazine with lots of information and interesting articles costs only £1 for a sample copy. 3 issues subscription (half year) costs £6 whilst a year subscription (6 issues) will cost you £10. Highly recommended by us at Pirate Connection hqs! SPZ

Power AM is a new Dutch station from the north-east part of Holland that was heard on 11420 & 11423 kHz on December 20th. Very good signals reported by Bill Lewis, but weak here in Sweden. The address for the station is believed to be Box 536, 7900 AM Hoogeveen in Holland, although not confirmed yet. BEFF BL MDG SPZ

Renegade Sound is the new name for Laser Hot Hits and has been heard on 6199/6200 kHz and 6310 kHz. Active both Saturdays and Sundays. Provides a format of dance music according to FDX. Has no address at the moment. FDX

76 metres. Activity has gradually increased the latest months and more and more stations are coming on the band. As reported above, **Radio Caroline** has been using 3925 kHz. Another newcomer is **PFBS** from Germany who appeared several times during Christmas on 3905 and 3910 kHz. Yet another one is **Subterranean Sounds** using 3945 kHz,

but they've been on for quite some time now with QSOs with LWR, WMR & RFI. Bill Lewis of **Live Wire Radio** (3910 kHz) tried to get a QSO with Pirate Andy several times on Boxing Day night, but got no contact with them. Also infamous **XMAS** was reported on 76 metres as well as their colleagues at **FRS Holland**. Operator Jolly Jake of **Radio Fusion International** was heard QSO-ing with **Weekend Music Radio** (3910 kHz) on the 22nd of December at 0.30, but after that Jake went for a 2 weeks' holiday, spending some time with his aunt from Australia who visited Sweden during Christmas. They hadn't seen each other for over 20 years Jake said... However, Jake is now back and have been heard with several CQ-calls weekday nights at 23.45-0.30 early January, had a 2½ hour QSO on January 15th at 0 UTC, now also in SSB mode (LWR has also been heard in USB as well as a UK based pirate named **PIT5** QSO-ing with LWR, WMR & RFI November 29th. This pirate said he had been transmitting back in the 60's on 2 Megs but was caught by DTI). He will run programmes on 76 metres (around 3915 kHz) twice a month or so Saturday nights as usual. The other 76 m-Swede **Starshine Radio** is expected back on 76 metres, but seems to have some work on his transmitter at the moment. Whilst 48 metres don't bring any activity on Saturday nights at the moment due to weak conditions, 76 metres seem to be a very good alternative. Most of the mentioned stations have been heard with very good signals here in Sweden, only station I have some problems in reading is Subterranean Sounds on 3945 who is a bit busy in modulation and weaker in signal comparing to WMR, LWR, PFBS & RFI. One station I've failed to hear is **SF03** ("Sierra Foxtrot 03") who's been noted on 3912 kHz QSO-ing with SS/WMR/RFI. January 10th had very good conditions on 76 metres with Russian **Radio Without Borders International** being heard here with Q3-4 quality! Also noted in Germany January 2nd on 3915 kHz with a relay (I guess) of **Radio Magic** which is the most easterly pirate in the Free Radio world! Had programmes in Russian so not much was understood. I hadn't heard RWBI for quite some time and I do hope they can stay on 76 metres. Unfortunately no other 76 m pirate was active that night, would have been a great opportunity for any of the 76 metre pirates to have a QSO with RWBI that night! Yet another pi-

rate began broadcasting on 76 metres on Saturday night January 16th on 3910 kHz, namely **Radio Waves International**. FDX told me it was a relay by RWBI and not via their own transmitters. I believe FDX is right, but I'm not 100% convinced. RWBI was running a programme prior to RWI that night on 3912 kHz and was also noted with a weaker signal than RWI. FDX SPZ SWN

YOUR FRIENDLY FREE RADIO STATION
THE BIGGEST SMILE ON YOUR DIAL

Radio Star is a new "Dutchie" on SW that was heard for the first time on November 22nd on 6204 kHz with an oldie format. The station announced an address of Box 51, 1777 ZH Hippolytushoef in Holland. FDX SPZ

Starshine Radio made another appearance on December 13th on 7415 kHz with good signals noted in Scandinavia and Germany. I've been in contact with the operator Kim Hawk who says that he's primarily an FM station playing oldies from the 50's and 60's. His transmitter runs at 70 W and Kim says he'll be irregular and can be found anywhere on the Free Radio bands. This was his second transmission on SW, the first broadcast was carried out Saturday evening November 21st on 3917 kHz with a 45 minute oldie programme. He got no reactions on this transmission, but his December 13th broadcast has so far resulted in 11 reception reports with very good results. 5 reports had Q4, 5 Q3 and one Q2. The reports came from Germany (6) and Sweden (5). Starshine also says he should be rather active soon and you might find him on any Free Radio band. Address: 12 Dorman Road, Preston, Lancs PR2 6AS, England. Please don't write the station name on the envelope, just Derek's private address! Please also note that Starshine has no connection with Fusion as supposed by FRS Goes DX. Latest info: Starshine made another test on 76 metres Saturday January 16th at 23.45 on 3917 kHz AM and

That was a great show, and I hope you liked it. Now till next time I hope all readers want to contribute to my column. Please write to me directly or to the box. I need to have your logs before Wednesday the 10th of March. Please tell me how you want the log to be like. Maybe I should put Dublin, DLR etc away, because they are always on the air. What do you think? Maybe you want more info about the programmes, language etc. Then please write and tell me about it. See you next time.

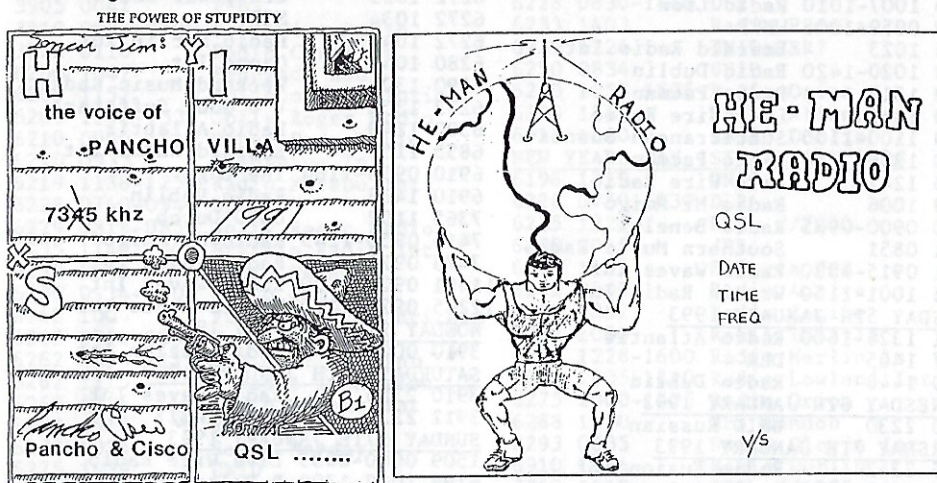

THE 7415 REPORT

By Chris Lobdell

Hi everybody! I hope all of our readers had a great Christmas and Happy New Year. The American pirate scene has been quite active of late with many new stations hitting the air. We don't have the space to cover them all, but we'll try to point out the main ones. Hallowe'en started off with a relay by WARI of an old tape of a Hallowe'en show by Radio North Coast International on 7415 at 1815 UTC on 31 Oct. Nice show of music by Phil Spector, with WARI programming after 1832 including an interview with the group XTC.

CSIC was also active, noted with a relay of the MYSTIC VOICE OF THE WESTERN PRARIE on 7415 at 2155 UTC (Add: BRS). Western mx was played. Their QSL shows a covered wagon and they supply an info sheet on the disappearing prairie land in the US heartland.

RADIO DEADMAN via CSIC was noted at 2226 on 7415 (no address) with errie organ mx and strange sounds.

At 2230 on 7409 kHz, RADIO HALLOWE'EN showed up (add: Wellsville) with a haunted house radio drama and vampire mx! Reports say it was heard in Europe!

After 0100 conditions deteriorated and very little was heard, THE DUTCH PIRATE UNIT from Europe was heard on 6312 kHz with such classic songs as "Radio Gaga"! This was a joint Radio Silverbird and Radio Pirana operation.

On 1 Nov. JOLLY ROGER RADIO (no add.) was noted on 7405 at 0203 UTC. This was the time Radio Fusion was testing from Sweden.

The only other thing noted was WITCH CITY RADIO at 0530 on 7415. We hope for better propagation next Hallowe'en!

The month of November saw lots of things happening. On the medium wave scene, CLAM popped up on 8 November (no add.) on 1620 kHz at 0327 with oldies, but they did sign off off with a nice lullabye!

RADIO COMEDY CLUB INTERNATIONAL was noted on 7416 at 1855 around 1850 UTC on 14 Nov. (add: BRS) with comedy sketches. Good signal for this time of day. Also

noted was RADIO ESOTERICA (add: Stoneham) at 2300 on 7410 kHz. Music was from Iceland and Cameroun. They use the slogan: "The Best Music You've Never Heard".

You've all heard of Radio USA, right? We had FAKE! RADIO USA on 16 Nov. at 2313 on 2312. The OM announcer claimed to be Andy Yoder (he wasn't) and was trying to sell his books to "help the pirates". The unknown OM announcer was giving out poor Mr. Yoder's phone number too.

RADIO AZTECA made another appearance with a new show at 2120 on 7416 on 21 Nov. (add: Wellsville). They were also heard on a couple of other dates.

The real RADIO USA made an appearance on 21 Nov. at 2305 on 7417.6 (add: Wellsville). Mr. Blue Sky set the record straight about the FAKER. They also did a nice relay of ROMANTIC SPACE RADIO with DJ Arty with Moscow's best rock!

Other November loggings were WEED RADIO (no add.) on 26 November at 0053-0127 on 7415 kHz featuring rock mx and sound effects.

The NORTH AMERICAN PIRATE RELAY SERVICE (NAPRS) (add: Wellsville) with a test broadcast at 0230 on 7410 kHz on 27 Nov. They were offering QSLs.

RADIO DC was heard at 2000 on 7416. A comedy interview with "Mr. Cadillac" was held. He is a President elect Clinton transition team member who wanted to be become head of the FCC!

The month of December was very active, especially toward the end of the month. WQRT (no add.) was heard with a test broadcast at 0326, 20 Dec.

WIRE LINE RADIO was noted on 21 December (add: BRS) on 7415 at 0209 with a Suzanne Vega song. This was also a test broadcast. Shortly thereafter, a station called RADIO PEACE or RADIO PETE came on at 0252 on 7415 kHz. They had a nice comedy show on the history of the USA, but announced no address.

The Candian station RADIO FLUFFERNUT (add: Merlin) was heard signing on at 0357 with a rock music show. Depeche Mode, The Cars and The Pretenders were all featured on 21 Dec. on 7415.5 kHz. This show was also noted on 25 December at 2230.

Someone (Ladd of the VOICE OF THE NIGHT?) broadcast an old RADIO CLANDESTINE show at 2305 UTC on 25 Dec. on 7414.25. It was R.F. Burns as DJ doing what he does best. Very enjoyable.

The New Year brought with it a nice show by CSIC at 2230 on 1 Jan. (add: BRS/Merlin). Reception was good on 7413. Rambo gave us a history of FCC busts for 1992. Then a nice show called "7415" prepared by DXer Gary Veraldi was presented. It was a composite of various pirates including air checks. Very nice show. Gary is looking for more pirates to send tapes to him at the Merlin drop.

RADIO AIRPLANE is a new station noted on 7417 kHz at 0300. Captain Eddie claims to operate with 100 watts from a Piper Cub airplane (add: Wellsville).

RADIO BEAVER was heard (add: Merlin) at 2128 on 7415 kHz on 2 Jan. Bucky Beaver was lamenting the closure of KUSW in Utah and played air checks of one of the sexy voiced female announcers.

That's it from this side of the Atlantic. Until next time, 73s and Fight For Free Radio!

ONE EIGHT SIX

With Derek Taylor

Happy New Year!

The big news story from the medium waves is the sudden and unexpected activity by the Dutch pirates on 183 metres. They have discovered that the range 1630 to 1640 kHz is relatively free of telex interference.

Over 20 stations from Holland have been logged since the middle of December. One of the main reasons for the move was the emergence of more QRM on 1608 kHz. This should be good news for the SW DX-ers as existing antennas should be ok providing an ATU (antenna tuning unit) is used, thus alleviating the need for special MW- or loop antennas.

Reception so far has been very good on these frequencies over most Europe. Don't worry! 186 metres is not dead. In fact it's just the opposite. According to the Dutch pirates it has never been busier, despite the QRM many new stations continue to be heard.

The following are some of the new operators logged here in Preston:

- Safari Park
- New Mexico
- Aloha
- Piperje
- Beer Zender
- Blauwe Cobra
- Billy de Bluffer
- Firma Jansen
- Vitesse
- Gouden Ster
- Zender Frederick
- Dolfyn
- Blitzkikker (B)
- Kleine Jopie
- Onbekend (B)
- Pirate Duo
- Piraten Unit
- Silverbird
- Walvis Baai
- Iene Mienie
- Jan de Tuinman
- Zendster Lydia (YL)
- Twentse Maffander
- 813
- Radio Vasse
- Albatros
- Utopia

Most of the names I have managed to decipher but I also have several unidentified stations. Another big surprise was the return of YL pirate Karina after 8 years.

I'll round off with a few short items plus some recent logs by myself and Stefan at the end of this column.

Verona (A) is temporarily without an address. He has closed the Box 178 in Lochem and mail is returned. Unfortunately, this is one of the very few Dutch MW pirates for which DPRS has no private address on file. Hopefully that will change soon. He's very active on the new 183 metre band.

Minerva has been caught by the RCD and seems to be off the air, but I guess that will only be temporary, hi! Calipso (B) has also been caught, but he's back again!

Finally please note, Japie de Blitzkikker has a new post box number. It's Box 27, 7595 ZG Weerselo in Holland. Please don't send any mail to the old Box 13. You can of course write to me at DPRS.

73 & till next time...Derek

Information from the DPRS

For most Dutch pirates, your reports can be sent to the Dutch pirate Radio Service run by our own MW-pirate expert Derek Taylor. When using this unique service, 1 IRC or 1 USD is required for the DPRS forwarding fee in addition to any return postage for the station! 2 IRCs or 2USD is required if you send a tape.

Several reports have been received by DPRS for a certain named pirate but it was someone else! Please check that the ID is actually from the pirate for whom the report is intended and not to another name mentioned by him. It will save time & dual costs of returning abortive reports and tapes.

If you have any problems in getting a reply from any of the stations using the Box 27 & Box 13 maildrops in Weerselo (Interpol, Jan de Tuinman etc) and also Radio Pirana from Oldenzaal, you can write to DPRS. Derek is authorized by a special signed certificate to issue QSLs! If they reply at all, you may have to wait a year, if you're lucky!

The Dutch Pirate Radio Service also offers a set of 5 Dutch 80 cent stamps for 2 pounds sterling or 4 USD (including postage). Write to: DPRS, 12 Dorman Road, Preston PR2 6AS, England.

LETTERS

By Stefan Printz

Welcome to a new column in Pirate Connection called "Letters" (might be changed if I find any more appropriate name). I get so many comments, thoughts etc to Pirate Connection so I thought it would be great to start a column in which you can say what you think about just anything. This time I'll focus your views on Pirate Connection which have been very positive, thanks to all of you!

Jan Ehnvall in Jakobstad, Finland writes:

...At the same time I want to thank you for the brilliant coverage of pirates in your mag. It must be impossible to do it any better as far as I can see...!

Joe Licher of Rainbow Radio Germany is also positive:

Your magazine is quite interesting, you put lots of enthusiasm into it and I wish you all the best with it.

Our own Derek Taylor who is a great contributor to PC writes:

Congratulations! What a great mag! Looks like you've put a lot of effort into this one (issue 2). Enjoyed the Scotland interview and the "Eastern Lookout" excellent! If we could get DX-ers to send us details of the QSL received, I'm sure it would make interesting reading. A QSL page is usually the first page to be read by DX-ers. It would I think make the magazine the best Free Radio mag on the market!

Thanks for your kind words Derek and thanks for the suggestion of starting a QSL column. I've thought about it and have decided to start a QSL column as from PC4. If there's anyone interested in writing this column, please contact me as soon as possible. All contributions should be sent to PC hqs.

Morris Walker in West Midlands, England signed a subscription to PC as soon as he heard of it:

I was really impressed by the content and layout of the publication - in fact excellent!

To my big surprise and joy, our readers in UK seems to be most enthusiastic about PC. Mike Barracough is no exception:

Thanks for the copy of PC. An impressive magazine and I mentioned it in the latest edition of Contact just published. I would also like to take out a subscription...

Maik Köhler from Germany has become an enthusiastic reader of PC and sends much info to us. He writes:

Thank you for the Pirate Connection with news, addresses and stories. It is very good, my compliments...

Another keen contributor to PC is Friedrich W Butt, also from Germany:

Many thanks for Pirate Connection 2. It's an excellent source of information for Free Radio listeners. One of the best available today I believe!

Bjoern Quaeck, editor of the famous FR mag Radiotelex a few years back, read our first edition and had the following comments:

Subscription rates did look expensive, especially for someone who doesn't understand the Swedish language. I liked the US & MW columns, seems you've found people to write about things they do know about! The address directory is really great, the only incorrect entry I noted was that Rocket 48 is actually called Rocky 48 according to a QSL I received from them. In my opinion, the "Euro Pirate Scene" section could include some pictures such as QSL-cards or stickers, the content was interesting anyway. Thanks a lot for your long letter Bjoern along with your Christmas logs! Well, as I told lots of people, PC1 was just something to start with, but apparently quite a few of you didn't like the articles in Swedish so I've decided to limit the pages in Swedish to 2 or 3 pages at maximum. PC will be at least 95% in English as from PC2 (this issue has nothing in Swedish!) so I'm sure you won't be disappointed. I'll also try to "lighten up" the pages of PC by publishing more pictures of QSL-cards and similar and I hope you'll like the new shape of "Euro Pirate Scene" which now has that kind of format I used to have in "On Air" (published by Malmö Short Wave Club). The subscription rate is not high in my opinion, but comparing to other Free Radio mags it might be a little bit expensier. I'm sorry Bjoern, I can't

go any further down in subscription costs due to the high printing costs here as well as high postage rates. I already put lots of money from my own pockets, you should know that the subscription money doesn't cover all the expenses I have. This mag is published entirely out of enthusiasm and a burning interest in Free Radio, I certainly don't earn anything by making this mag, quite the reverse! But thanks for your comments anyway and also thanks for the correction concerning Rocky 48!

One of our favourite DJs here at PC hqs is Bill Lewis of Live Wire Radio, he has also made a few great PC promo jingles which you can hear over many FR stations. He says the following about PC: *Thanks for my copy of PC. I will be honest with you and say that I thought it was excellent! I especially like the Radio Scotland story + also the one about the FM pirates. Very good I hope you sell many copies!*

Thanks Bill. We've had a tremendous increase of new subscribers to PC the last two months and we now have 65 regular readers. For PC2 we also had around 25 orders of sample copies which makes a total of 90 copies. Not bad for a brandnew pirate mag eh?

Another favourite DJ is Mr Ipe on Radio Perlee. He says:

Compliments for the great new magazine Pirate Connection, a Swedish counterpart of the Pirate Chat. I will be glad to promote it for you of course...

John Winther Nielsen in our neighbour country Denmark writes a pirate column in Danish Listeners' Club's mag "DX-Fokus":

First of all the best success with your new mag which I read with great interest, e.g. the CPL list is handy as well as the MW section with lots of Dutch pirates.

My dear brother Anders Printz in Stockholm was a keen Free Radio DX-er some 10 years ago and it was he that once got me into this wonderful hobby. He has revived his listening and has also provided PC with quite a few logs and information. Maybe it was the Pirate Connection magazine that got him back into the hobby:

It's very informative and very comprehensive, and very well-written with a nice layout. I'm really impressed.

Jan Thörnblom has reviewed Pirate Connection on one full page in Sweden's biggest DX-mag "Eter-Aktuellt" (distributed to 1300 people and many libraries) and he concludes:

"This is a magazine that's a must for anyone who is the least interested in pirate radio".

Stefan Printz

Mike Evans sells hand made "Octagon" Medium Wave loops which are very directional and selective. Also have good forward gain. And it's very cheap; will cost you 35 pounds sterling if you live in the UK (including postage and packing) and the rest of Europe 43.50 pounds. For further information on the Octagon loop, contact: Mike Evans, 120 Loughton Way, Buckhurst Hill, Essex IG9 6AR, England. Enclose SASE or 2 IRCs.

Pirateinformation from Finland 1993

Finnish pirate radiostations (Free Radios) usually operate on the 48 meter band 6200 - 6300 kHz. Many stations can also be found on FM-band 88 - 108 MHz locally. On short wave frequencies outside 48 meter band are used only seldom, but sometimes you might hear stations around frequencies 7360-7390, 9980, 11400 and 15040 kHz.

FM-stations can be on the air almost anytime, but the best time to listen to FM-pirates is to switch on your radio at weekends around 2100 - 2400 local time. Short wave stations have a tradition to be on the air at Sundays around 1100-1300 local time. Nowadays stations have also been on the air at weekend nights after midnight. Best night to try is the night between Saturday and Sunday.

Most stations answer friendly to listeners letters and reception reports. You should remember to enclose 2 IRC's or 3,50 FIM postage stamp to cover the mailing costs. If you need any technical advice, the best stations to write are Meteor, Mayday and Diablo. Questions about starting and running your own station can be sent to any station. The main addresses are P.O.Box 220342, D-5600 Wuppertal 22, Germany and P.O.Box 82, SF-40101 Jyväskylä, Finland. If you use the Jyväskylä-box, please don't write "Radio" on the envelope. Preferably use only station initials.

Most stations transmit only music for younger generation (pop, rock and disco) and small bits of talk. Some stations and DJ's use heavily effects, jingles and echo. Only few stations have longer spoken parts in their shows. One of them is Radio Meteor, who have sometimes good piratenews and -info in Finnish language.

The amount of stations has been raising all the time since the "recession" in the early and mid 1980's. New stations appear both on FM and SW all the time, but too many of them disappear or quit pretty soon.

This is what you can hear

Radio Meteor, Wuppertal and Jyväskylä boxes. The station has been founded already in 1980. The founder, DJ and operator of the station is **Rick Random**. Today the station broadcasts with the power of about 60 watts. Valve transmitter. The most frequent frequency to try is 6239 kHz, but you should also listen to 6274 and 7360-7390 kHz.

Radio Mayday, Wuppertal and Jyväskylä boxes. This station has been founded in 1988 by **Frank N. Stein** and **The Technician**. Programs are presented by **Frank** and **Susan Stein** (the only female pirate-DJ in Finland). Station broadcasts mostly on 6274 kHz, but also 6240, 6258 and 9980 kHz can be used. Transmitting power can be anything between 15 and 90 watts, as Mayday has many transmitters to use. With 90 watts Mayday has also been heard in Canada, North-America.

Radio Scanwood, Wuppertal and Jyväskylä boxes. Scanwood started broadcasting in 1980 and it uses many frequencies on 48 mb. It has been on the air very seldom lately. The DJ uses name **Mister X**.

Radio Bristol, address is not known. Last known address was P.O. Box 41, 7700 AA Dedemsvaart, Holland, but this box doesn't seem to operate any longer. Bristol has also been founded in 1980. Nowadays the station transmits very irregularly, mostly at Christmas time, on 6233 kHz. Other 48 mb frequencies may also be used.

Radio Diablo, Wuppertal and Jyväskylä boxes. Diablo started broadcasting in 1991. It transmits anywhere on the 48 mb mostly at weekend nights. The transmitting power is around 20 watts. Valve transmitter. One of the DJ's is **Jack The Ripper**.

Voice of the Free Radio (VoFR), Wuppertal and Jyväskylä boxes. The operator **Tom Collins** founded this station in 1989. The DJ's include **Tom**, **Lasol** and **Saigon**. The best frequency to listen to is 6240 kHz. At the moment the transmitting power is 17 watts from a valve transmitter to a half-wave horizontal dipole antenna.

Radio Relax, Wuppertal and Jyväskylä boxes. The same operator has been transmitting with many different names since the late 1970's and "Relax"-name has been used since 1989. The operator and DJ is **Robert Eb**. Nowadays the station is on the air very seldom, but it might be heard on the 48 mb with 15 watts of power.

Right-Wing Radio (RWR), Wuppertal and Jyväskylä boxes. This station has been founded in 1985 and operated on FM (95,9 MHz FM Stereo 150 watts) and SW (6225 kHz 15 watts) in Jyväskylä until 1988 when it was raided. RWR is still on the air on 48 mb via relays few times a year. Many DJ's, for example **Tex Willer**, **Saigon**, **Simon Heel**, **Radio-Rambo**, etc.

Radio Milliwatti, Wuppertal and Jyväskylä boxes. Milliwatti has been founded in 1990 by DJ **Lasol**. It has been broadcasting on FM 106 MHz and it has been planning SW-transmissions, but the future is uncertain. The transmitting power has been around 1-4 watts.

Jolly Roger Radio, Wuppertal and Jyväskylä boxes. This station has been founded in 1989 and it has been transmitting on FM in Central-Finland. Low power, less than 10 watts. The future of this station is uncertain.

KISS FM, Wuppertal and Jyväskylä boxes. KISS FM was started as a very big operation in 1989 to continue the work of RWR and it used to broadcast on 95,9 MHz in FM Stereo with a high quality PLL-crystal oscillator transmitter in Jyväskylä. DJ's were **Tex Willer**, **Pale** and **Radio-Rambo**. The station is inactive now, but as all of the equipment is still in town, the station may reappear.

Radio Aallot, Jyväskylä box. This station started in 1990 and it transmits on 104,5 MHz in Päijät-Häme. The transmitting power is 10 watts and the transmitter is a high-quality one made by **Veronica FM, UK**.

Radio Rupikonna, no address known, but can be reached via Jyväskylä box. Operates on FM in Pori, West-Finland.

Radio Decline, no address known, but can be reached via Jyväskylä box. Operates on 6140 KHz and 48 mb in Pori, West-Finland. High power, but irregular.

Radio Galaxy, no address known, but can be reached via Radio Milliwatti. The station has been founded in 1991 by operator and DJ **Mega Hertsi**. Operates in Jyväskylä on 96 MHz FM. The transmitting power is 15 watts and the transmitter is a high-quality PLL-crystal oscillator **Veronica FM**-transmitter. Other DJ's are **Saigon** and **Lasol**. Plans to switch to FM Stereo and will also start SW-transmissions with the help of former **Radio Royals** (operated around 1981) operators.

Radio Bonanza, Jyväskylä box. Bonanza has been founded in 1991. It operates irregularly on 48 mb with 15 watts of transmitting power. The operator and DJ is **Jack Killian**.

Radio Wega, Jyväskylä box. This Wega has no connections to former Radio Wega, who operated in Jyväskylä in 1989. This one has been found in 1991 by the operator and DJ **Mega Watti** in Kouvola area. Station operates on 96,3 MHz in FM stereo with 150 watts of power. The driver transmitter is a 35-watts PLL-crystal oscillator Veronica FM-transmitter, stereoencoder is from Holland and the 150 watts linear amplifier is ex-Radio Nova (Rauma, Finland 1983-84).

Metsäradio, Wuppertal and Jyväskylä boxes. "Forestradio" has been found in 1992. They operate on 48 mb mostly on 6240 kHz. The station uses modern radioamateur transceivers (AM-mode anyway), so they can use almost any frequency and power they want.

Radio Matilda, Wuppertal box. A special station name which is used when Finnish pirate operators are having meetings and joint transmissions on SW. Stations who have been taking part in Matilda-transmissions are: Mayday, Voice of Free Radio, Diablo and Right-Wing Radio. The frequencies have been 6205, 6240 and 6275 kHz at the same time in SW stereo = left and right channels on different frequencies. Plans to appear 1-2 times a year.

Studio 7, no address known. Operates in Jyväskylä on FM in frequencies above 100 MHz. Old station, but low power and irregular transmissions.

Radio Mega, no address known. Has been founded in 1991. The station operates on 91,2 MHz in Kotka, South-East Finland. The transmitting power is about 10 watts, sometimes in stereo. Mega is related with Radio Wega.

Radio Vapaa Perämeri, no address known. This station has been heard in 1992 in northern Finland in Oulu-area on FM. Large coverage = high power.

Radio Nightmare, no address known. Operates in Kouvola area on FM 96 MHz (4 watts), SW 6240 kHz (40 watts) and SW 7379 kHz (40 watts). Operator is DJ **Freddy Krueger**. Irregular transmissions.

Hell's Chest, no address known. This is a TV-pirate operating in Kouvola area on channel 23 with 6 watts of transmitting power. Station was raided in 1992, when part of equipment was lost, but no operators were caught. The station will be back on the air soon and it is related with Radio Nightmare.

Unidentified stations, no address known:

-Broadcasts in East-Finland in rural countryside. Station operates in 88,2 MHz FM Stereo. Transmitting power now is 4 watts, but should be soon 50 watts. The operator and DJ is **Tuho**. The station is also starting TV-pirate-transmissions on channel 2.

-Broadcasts in Jaala in Kymen lääni-area in 99,8 MHz FM. Unstable transmitter, but high power and large coverage.

Listen out for Finnish pirates as they are not so hard to hear as you might think. If you have problems in identifying the stations you heard, you can always send a cassette-recording for inspection to **Free Radio Campaign - Finland (FRCF)**, P.O.Box 82, SF-40101 Jyväskylä, Finland. Remember the return postage.

ANTENNA MASTER MEDIUM WAVE ANTENNAS FOR USE WITH ANY RECEIVER.

ATL-1 A lightweight and collapsable 30 inch square, indoor Active Tuned Loop, supplied complete with batteries and receiver connecting leads. Excellent sensitivity and noise rejection with sharp rotatable nulls. Covers 525 to 1680 kHz with balanced tuning, also 145 to 590 kHz not balanced. Very easy to use.

***** PRICE * ATL-1 £58 * UK post £4 * World surface £7 *****

ALN-1 An Active Loop with adjustable noise Nulling. This 20 metre circumference outdoor design with desk top noise nulling controls is broadband, quiet and sensitive. Adjustment reactively cleans medium wave signals by oppositely phasing and mixing feeder collected location noise.

No external connections are required, simply clip the loop vertically or hang almost anywhere; e.g. 12ft high by 20ft long. It has a signal handling range in excess of 100dB with a figure of eight sensitivity pattern and two switched ranges; - 100kHz to 1.9MHz or 500kHz to 6MHz. The ALN-1 is supplied fully assembled with loop antenna, 30 metres of feeder cable, the boxed receiver matching transformer + MW noise nulling controls + switched battery supply, and three receiver leads.

With a good receiver the ALN-1 can resolve to levels four times weaker than a normal active tuned loop: An easy way to good reception.

***** PRICE * ALN-1 £64 * UK post £5 * World surface £10 *****

BW-1 This passive Basic Wire antenna comprises; - an antenna wire 20 metres, earthing clip, 15 metres of feeder cable, a ferrite coupler for portables with secondary sleeve for "A+E" receiver connection, plus tape, ties and clips.

Erect as a simple random wire, or a 10 metre, counter-inductive, helical-wound vertical. Capable of transatlantic MW reception and useful for Long to Tropical frequencies.

***** PRICE * BW-1 £18 * UK post £2 * World surface £4 *****

PWN-1 A more versatile Passive Wire antenna system with adjustable noise nulling. Supplied with; - antenna wire 20 metres, the earthing clip, a boxed and switched range antenna transformer - 150kHz to 2MHz or 1 to 6MHz, 30 metres of feeder cable, a boxed receiver matching transformer with reactive MW noise nulling controls, clips, ties and tape plus a set of three receiver leads.

The PWN-1 provides low, medium and balanced outputs, may be used with an existing antenna or Beverage and is most effective in combating mains supply interference. Good reception with economy.

***** PRICE * PWN-1 £39 * UK post £4 * World surface £7 *****

NPM-1 A desk top signal Notching or Phasing and Mixing control unit that provides directable nulling of any unwanted signal. The NPM-1 is capable of cardioid response generation with co-sited loop and wire antennas or spaced wire antennas, and a more unidirectional response with spaced loop antennas - 50 metres. It also can be used to increase selectivity or notch at MW and LW frequencies. Use with ALN-1 and PWN-1 antennas for transatlantic listening.

AM-1 System, comprising ALN-1 + PWN-1 + NPM-1

***** PRICE £136 * UK post £8 * World surface £20 *****

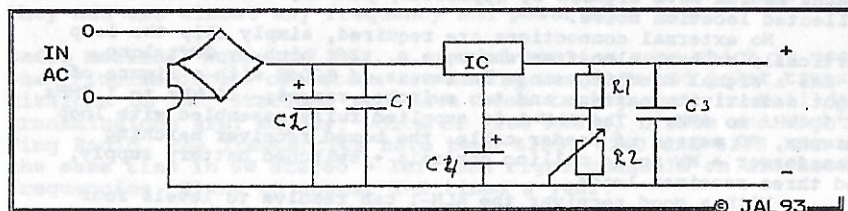

Prices valid to March 1993. Enquiries, with SASE please, to -

G S Maynard, 16 Woodford Avenue, Newtownabbey, N.Ireland, BT36 6TL.

Happy new year all Pirate-fans!

Now we will take a look on FM, and see what we can do there.

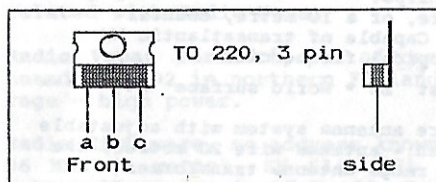

You have probably noticed that the government-run radio, doesn't play your kind of music. So why don't you do anything against that? Build up your own FM-station and start to produce good music on the radio. What we need now is a good working power supply unit. The one we buildt in PC No 1 is good, but it doesn't generate all the power we gonna need. So here are a simple circuit for a good working PSU:

C1 0,1 μ F MKM 100V
C2 10 μ F / 40 V
C3 1 μ F MKM 250 V
C4 2200 μ F / 40 V

R1 120 Ω (Brown Red Brown)
R2 4,7 k Ω (5 k Ω)
IC LM 317 T or equal.
D1-D4 1N4004 or equal

This one is adjustable from 1,2 to 35 V DC, 80 dB ripple rejection, thermal and overload protected, output current 1 amp.

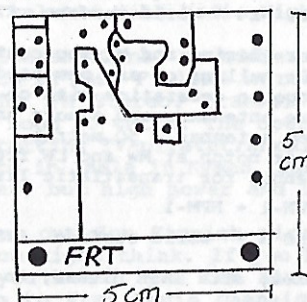

The LM 317 T need a 40 cm² = 6,2 inch² cooler shaped like a S

The IC conection:

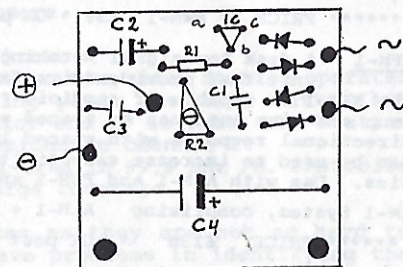

28 VAC is maximum allowed for the input voltage. I use a 220 VAC/25 VAC transformer for this power supply. It is very stable and I do recommend it..

Back of the board:

Component placement

You can also buy it from Velleman-kit. K1823 1.5 A Power Supply

Jolly Jake's RAMBLING THOUGHTS THE GODS OF SHORT WAVE

Hi there lovers of Free Radio! Heartly welcome to this new column which our own Free Radio king Stefan (sorry, prince Stefan) talked me into writing. Well I think most of you know me, if not I can tell you that I'm the operator behind Radio Fusion International and I'm active on many nights (especially Saturday nights) on 76 metres and also Sunday mornings somewhere on 7415-7430 kHz (my main dial is 7415 kHz) at various times. I'm sure Stefan will inform you more about my station elsewhere in this great mag. Anyway I can tell you that I'm thinking of broadcasting on SSB instead of AM; AM which I just think is a waste of power. With 100% modulation 50% of the power lies on the carrier and the other 50% divided by the two sidebands. So why not give SSB 'a shot' even though I know it's a kind of tradition for the pirates to broadcast in pure AM. Someone told me I shouldn't be in SSB and stop QSO-ing, because that's no pirate radio I was told. But why should I care? I don't force anyone to listen to my great shows or QSOs. I like pirates that are enjoying themselves and have lots of fun while transmitting and so I think quite a few people appreciate my programmes because I'm this kind of pirate who is on the air because I enjoy it a lot. I don't care what other people say actually, because I have a programme format quite different to other pirates and I'm trying to create a station that I would like to enjoy listening to myself! So there you are... Well I do appreciate all mail I get of course and most people say they enjoy my programming, and a handful of people have been very enthusiastic about my station. Actually I don't know what to write about in this column so I'll just write about anything that pops into my mind...so watch out...I am a very naughty boy sometimes as my mother always used to say...so what shall I say next...thinking...even more thinking...gotta blow my nose...hang on...just got a terrible cold...my snot comes pouring from my nose constantly...you know we have a real winter in Sweden at the moment with terrible hurricanes...sorry, guess I'm boring you too much. Where were I? Nowhere I suppose. Well I think I'll give you my thoughts on the current Free Radio SW scene. Or rather perhaps...anti-thoughts (whatever that means?). I'm very fed up with these nonsense talk (in the Free Radio mags and by other certain people) about what stations that are 'good' and 'bad', about what stations that are worth listening to and those that are not. And sometimes I even hear people saying that some stations should not have the right to exist on the airwaves, because of their 'poor' programme quality. And the sad thing is that so many readers and listeners believe in this crap or 'rent skitsnack' to say it in Swedish. Who do they think they are? Gods of Free Radio? Fact is that those people have not yet understood what Free Radio really is, nor have they understood that there are other people who actually prefer listening to Dutch pirates for example, instead of listening to 'chewing-gum pop music' (Swedish expression I hope you'll understand) programme formats from, in my opinion, rather boring stations such as Free Radio Service Holland. They consider themselves as a 'quality' station and they sell those ridiculous T-shirts saying "FRS Holland - the quality one". Please tell me, what is quality? To me, quality is up to each individual to decide, e g what they like to listen to. Thought this was self-evident, apparently not to some people. To me, FRS Holland is the definition of non-quality (well maybe I should put it this way: at least they are no better than any other pirate). Once I heard their DX-programme they read every single word directly from their magazine FRS Goes DX. One of the most boring programmes I've ever heard. Then I'd rather tune in some Dutch pirate on 1636 kHz listening to some nice nonstop Dutch folk music! Will be interesting to see if the FRSH or any other who might feel accused will send me any comments on this, I guess they'll already considered me as some stubborn fool...well they can think whatever they want...but they really should need a lesson or two in basic nihilism. And they certainly don't know about the law of Jante...See ya all around next time, special greetings to the staff of FRSH...
